EDUCATION

Bachelor of Science – ECE: Computer Engineering

University of California, San Diego

Jun 2027

SKILLS

Language| English, Spanish

Front End| JavaScript, CSS, HTML

Back End| Python, Java, C, C++, C#, MySQL

Testing/Deployment| JUnit, Ubuntu, Linux, Colab

Developer Tools| Git, Unity, Roblox Studio, Netlify

Hardware | Electronic Components, Testing & Debugging

COURSE WORK

ECE 35 Introduction to Analog Design: Analyzed and designed basic analog circuits using resistors and capacitors

CSE 12 Basic Data Structures and Object-Oriented Design: Developed strong foundations in OOP using Java

CSE 100 Advanced Data Structures: Implemented and analyzed data structures and algorithms in C++

EXPERIENCE

UC San Diego SuperComputing Cluster Competition Hashcat Competitor

Feb 2025 – Present

Competitor for the Student Cluster Competition @ UC San Diego

Ubuntu Linux | Python | Raspberry Pi

- Ranked 3rd place SBCC25 ([Result Page](#))
- Developed Python automation scripts for batch attacks and hash preprocessing for the Hashcat benchmark, optimizing GPU acceleration for high-performance password recovery on Raspberry Pi 4 clusters

Instructional Computer Science Instructional Design Assistant | UC San Diego, La Jolla, CA Jun 2024 – Apr 2025

Instructional Designer for Computer Science Education courses K-12 ([Course Page](#)) Coursera | Project Management

- Developed and implemented course materials on Coursera for 3 UCSD Computer Science Education courses, impacting 500+ students
- Redesigned EDS124AR with new tech-focused content (AI in Society, Cybersecurity, Climate & Tech, Algorithmic Bias, and Robotics) and ensured code accuracy (block-based and Java) in EDS124BR/EDS124CR for K-12 programming education

Vice President of Programming | UC San Diego ColorStack, La Jolla, CA

Jul 2024 - Present

- Co-founded and launched the first chapter of ColorStack at UC San Diego, establishing a growing community of Latino and Black engineers with over 43 active members
- Hosted 5 club events such as general body meeting, career panels, and resume workshops with Google, Expedia, INUIT, and Netflix to help members get started on their technical career journey

Prison Project Research Assistant | UC San Diego Student Research Lab ([SIGCSE Paper](#)) Apr 2024 – Present

Researcher for computer science education in prison systems

Python | Colab | SIGCSE

- Co-authored a SIGCSE 2025-accepted paper on computer science education in prison systems, highlighting student confidence and centering justice-impacted voices
- Analyzed qualitative data from 50+ students, visualizing findings using Python, Seaborn, and Statistics in Google Colab

Computer Refurbishing Volunteer | C2K, San Diego, CA

Dec 2023 – Present

Volunteer for non-profit providing computers to low-income families

Hardware Testing | Refurbishing

- Volunteered 20+ hours providing education software and technical support to children and families by refurbishing electronics and participating in computer distribution events; Inspected, troubleshooted, and refurbished hardware over 16 devices, including desktops, laptops, and mobile devices for distribution

Code Sensei | Code Ninjas, Chula Vista, CA

Nov 2021 – Aug 2022

Programming Instructor for children developing video games

JavaScript | Python | Lua | C# | Unity

- Mentored over 40 students in programming C# with Unity Engine and Lua in Roblox Studio, all students finished with a complete video game to present by end of program
- Tailored instructions to students depending on their skill level, cultivating a supportive learning environment while introducing students to fundamental concepts of full-stack development and held over 4 coding camps with 90 total students
